

Congratulations!

We look forward to assisting you with your self-care regimen!

Dermal Filler

POST-TREATMENT

No make-up over injection sites until the following day

You can apply ice to the area as needed

Avoid UV light exposure x 24 hours

Avoid exercise x 24 hours

Avoid heat (saunas, sun beds, hot showers) x 24 hours

EXPECTATIONS

- Bruising can occur and typically fades after 5-7 days.
- Tenderness over area treated can last up to 1 week.
- If you feel lumpiness in the area, massage the area with Vaseline or Aquaphor.

WHEN TO CONTACT SKINLOGIC

- Swelling, puffiness or lumpiness which does not fade in the first week with gentle massage.
- The filler changes texture and becomes hard or the area becomes increasingly red over the first 48 hours post-treatment.
 - Any crusting or signs of infection.
- If you develop increasing pain near or above the site of injection that gets worse over time, especially if associated with pale area of skin indicating a lack of blood flow, immediately contact us!
